

The Shenzhen Fast Fang

The Shenzhen Fast Fang Dragon is a rare type of mythical creature that is a symbol of love because they listen to how people feel.

Most Shenzhen Fast Fangs are yellow. However, a few black and white Fast Fangs have been seen. They have the wings of a butterfly and the horn of a unicorn. They are as strong as a lion, but are much cuter.

Fast Fangs are found across the city of Shenzhen especially around the Coco Park where they can always meet their friends. Usually, Fast Fangs feed on dim sum and congee, but occasionally they enjoy eating claypot rice.

Shenzhen Fast Fangs are renowned for being kind. Worryingly, they are very dumb when they are thinking of solutions.

Dragonologists have been worried for many years about the habitat of the Shenzhen Fast Fang. To protect these beautiful creatures, all dragon lovers should feed them dim sum and congee if you see them.
